AI Engineer • Production LLM Systems, Backend & Data Platforms

Introduction

AI and backend engineer (6+ yrs, Python/Go) building production LLM agents, evals and data platforms, currently at Certa for Fortune 500 compliance teams. Cut infra costs by up to 50%, built terabyte-scale pipelines across AWS/GCP/Azure; published researcher and inventor on US/EU/India patents.

Skills

- Python
- GoLang
- PostgreSQL
- MongoDB
- Docker
- AWS
- Google Cloud
- Azure
- ReactJS
- OpenAI
- LangChain
- Jenkins
- Git
- Django / FastApi
- Airflow
- DBT
- BigQuery / Redshift
- Snowflake
- Kinesis / Kafka
- Spark

Work Experience

Certa | *January 2026 - Present*

AI Engineer - 2

- Building customer and vendor facing AI agents for risk analysis, contract analysis, vendor questionnaire prefill, and risk adjudication
- Building the backend that makes the platform self-serve, without professional-services involvement
- Building the AI agent that generates platform configurations from requirements in natural language. Built the evals framework, agent skills framework and MCP setup for this agent from scratch
- Drove a **5x increase in AI adoption** across professional services, making them **30% more productive**

AppsForBharat (SriMandir) | *April 2024 - December 2025*

Senior Software Engineer 2 - AI & Platform

- **Launched SuperAstro, an AI astrology app** (subscription-first), by making core services multi-tenant
- Built a **devotional AI companion** inside SriMandir from scratch
- Built a WhatsApp feedback system for customer support, **raising feedback rates from 38% to 79%** and increasing user engagement
- Moved video processing pipelines onto GPUs, **cutting processing cost by 50%**
- Migrated KCL checkpointing from DynamoDB to Redis (ElastiCache), **saving $4K/month**
- **Set up CI/CD for stream-processing engines**; mentored engineers on the team
- **Raised clickstream user-identification coverage from 10% to 77%**, cutting cost and improving quality
- Built ETL for a terabyte-scale MongoDB cluster and streaming / batch ingestion and extraction pipelines to MoEngage, Interakt, Exotel, Mixpanel, Zoho Desk and others

DoctorC | *July 2021 - December 2023*

Senior Software Engineer

- Redesigned unit-economics measurement for sharper insight across the product
- Owned MIS reporting and growth projections for investors
- **Optimised contractor incentive algorithms and AWS deployments, saving $600/month**

Software Engineer

- Built data infra & data-quality pipelines from scratch including core analytics models for growth & retention
- **Built a lead-ranking ML pipeline** to prioritise high-conversion leads during COVID
- Built demand-sensing tools to measure interest in new cities before launch
- Analysed consumer behaviour to surface seasonal trends and retention patterns
- Built growth and operational performance dashboards; took ownership of the existing analytics systems
- Partnered with the Head of Finance and the CEO on investor requests and vendor due diligence

Optum | *July 2020 - July 2021*

Software Engineer

- Migrated mainframe batch jobs to Spark; built a Python loader for mainframe binary data

Bosch Global Software Technologies | *January 2020 - June 2020*

Project Trainee (AI Intern)

- Built core systems for Bosch AIShield; named inventor on 4 of its patents (US, EU, India)
- Researched linear-algebra optimisation and developed an eigendecomposition method that beats NumPy under specific constraints (published, Springer)
- Researched graph neural networks, leading to NodeNet (arXiv)
- Implemented the quantum computing team's algorithms on available quantum hardware

Education

B.Tech. in Information Technology | *Institute of Technology, Nirma University* | *August 2016 - July 2020*

Research Papers & Certifications

- Eigenvector Component Calculation Speedup over NumPy for High Performance Computing [arXiv / Springer]
- Virtual SAR: A Synthetic Dataset for Deep Learning based Speckle Noise Reduction Algorithms [arXiv / IEEE DataPort]
- NodeNet: A Graph Regularised Neural Network for Node Classification [arXiv]
- Microsoft Certified: Azure Data Fundamentals
- Microsoft Certified: Azure Fundamentals
