Introduction

I am a Senior Software Engineer with 6**+ years of experience** building production AI systems and scalable backend infrastructure using **Python and GoLang**. Proven track record of optimizing cloud costs by 50%+ and architecting data pipelines processing TB-scale datasets across AWS, GCP, and Azure.

Skills

- Python
- GoLang
- PostgreSQL
- MongoDB
- Docker
- AWS
- Google Cloud
- Azure
- ReactJS
- OpenAI
- LangChain
- Jenkins
- Git
- Django / FastApi
- Airflow
- DBT
- BigQuery / Redshift
- Snowflake
- Kinesis / Kafka
- Spark

Work Experience

Certa | *January 2026 - Present*

AI Engineer - 2

- Built the backend to make the platform self serve
- Built an AI Agent to assist people in generating the platform configuration in the most efficient way
- In professional services teams, **increased AI adoption by 5x**, making them **30% more productive**
- Built the evals framework, skills framework and MCP setup from scratch

AppsForBharat (SriMandir) | *April 2024 - December 2025*

Senior Software Engineer 2 - AI & Platform

- Launched an **AI driven astrology app** with subscription first monetization model
- Built a **devotional AI companion** for the app users from scratch
- Optimised video processing pipelines to leverage GPUs, **reducing the cost by 50%**
- Moved KCL checkpointing from DynamoDB to Redis (EC) resulting in **savings of $4000 per month**
- Implemented ETL for a TB scale MongoDB cluster
- **Setup CI/CD pipeline** for stream processing engines
- Developed an end-to-end customer feedback system via WhatsApp, **increasing user feedback rates from 38% to 79%** and enhancing support engagement
- Setup streaming, batch, data ingestion & data extraction pipelines for various destinations (MoEngage, Interakt, Exotel, MixPanel, Zoho Desk, etc)
- Optimised user identification on clickstream data which lead to reduced costs & improved data quality. This **increased user identification coverage** for analytics **from 10% to 77%**

Inai | *January 2024 - March 2024*

Senior Software Engineer

- Worked on the development of the Optimize & Recon products

DoctorC | *July 2021 - December 2023*

Senior Software Engineer

- Redesigned unit economics measuring system, which lead to increased efficiency and better insight into all parts of the product
- Optimized AWS deployments which lead to **savings of $ 600 per month**
- **Optimized contractor incentive & increment algorithms**
- Owned the MIS reporting and growth projections for investors

Software Engineer

- Built the data infrastructure & data quality pipelines from scratch using DBT
- Setup core data models in DBT for operational, growth and retention analytics
- Owned existing analytics systems
- Built growth and operational performance analysis dashboards
- Built tools to measure interest in a new market before launching, to target better cities
- **Built a lead ranking ML pipeline** to identify high conversion leads during COVID
- Analysed consumer behaviour to find seasonal trends and retention patterns
- Worked with the Head of Finance and the CEO on investor requests & Vendor Due Diligence

Optum | *July 2020 - July 2021*

Software Engineer

- Migrated a set of batch jobs from mainframe to big data environment using Spark
- Developed a tool to load binary data file into any modern database using Python

Bosch Global Software Technologies | *January 2020 - June 2020*

Project Trainee (AI Intern)

- Built the core systems for Bosch AIShield
- Did research in the areas of Linear Algebra Optimization, Graph Databases & Graph Neural Networks
- Supported the quantum computing team by implementing their algorithms on available quantum computing systems

Education

B.Tech. in Information Technology | *Institute of Technology, Nirma University* | *August 2016 - July 2020*

Research Papers

- Eigenvector Component Calculation Speedup over NumPy for High Performance Computing [arXiv / Springer]
- Virtual SAR: A Synthetic Dataset for Deep Learning based Speckle Noise Reduction Algorithms [arXiv / IEEE DataPort]

- NodeNet: A Graph Regularised Neural Network for Node Classification [arXiv]

Certifications

Microsoft Certified: Azure Data Fundamentals • Microsoft Certified: Azure Fundamentals • Deep Learning Specialization (Coursera / DeepLearning.AI) • Machine Learning (Coursera / Stanford University)
